

The Airliner

Milani Francesco - 5^AI

Introduction

1st warplane – World War I

1st Jet Plane – World War II

1st Ariliner – 1952

Major manufacturers: Boeing, McDonnell Douglas, Tupolev, Airbus, Antonov

Most famous airliners

Boeing 747

Aérospatiale-BAC Concorde

Tupolev TU-144

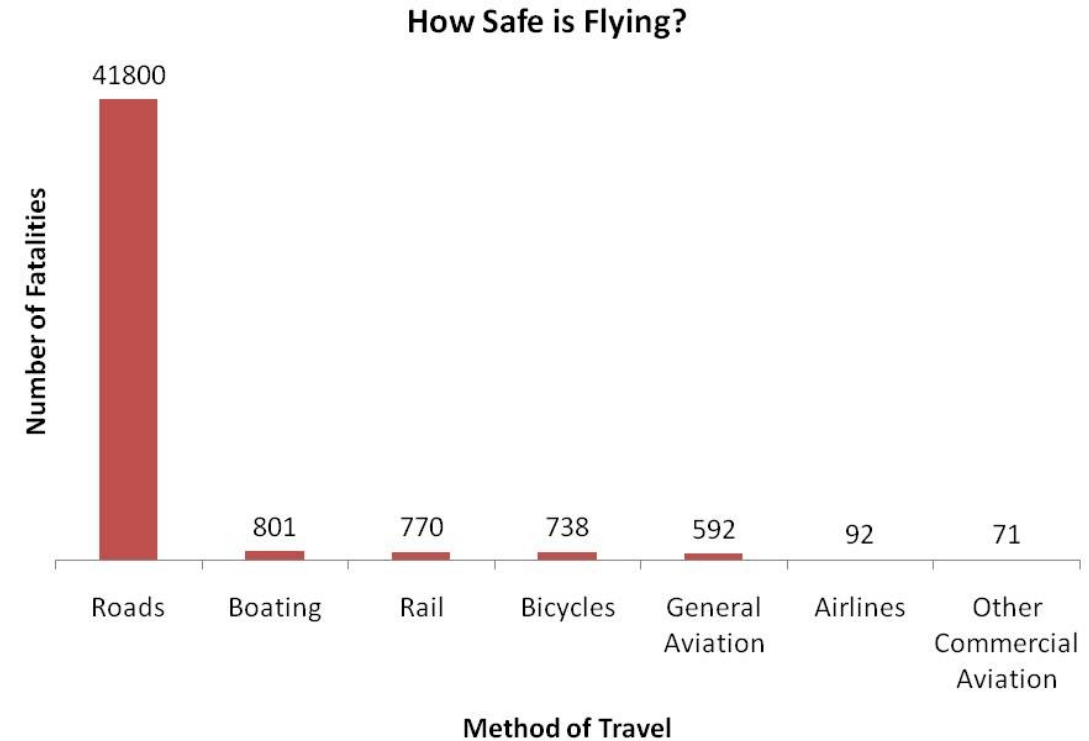

Airbus A380

Strong points

- Easy to travel over long distances
- Travel shortness
- Safer than other travel methods

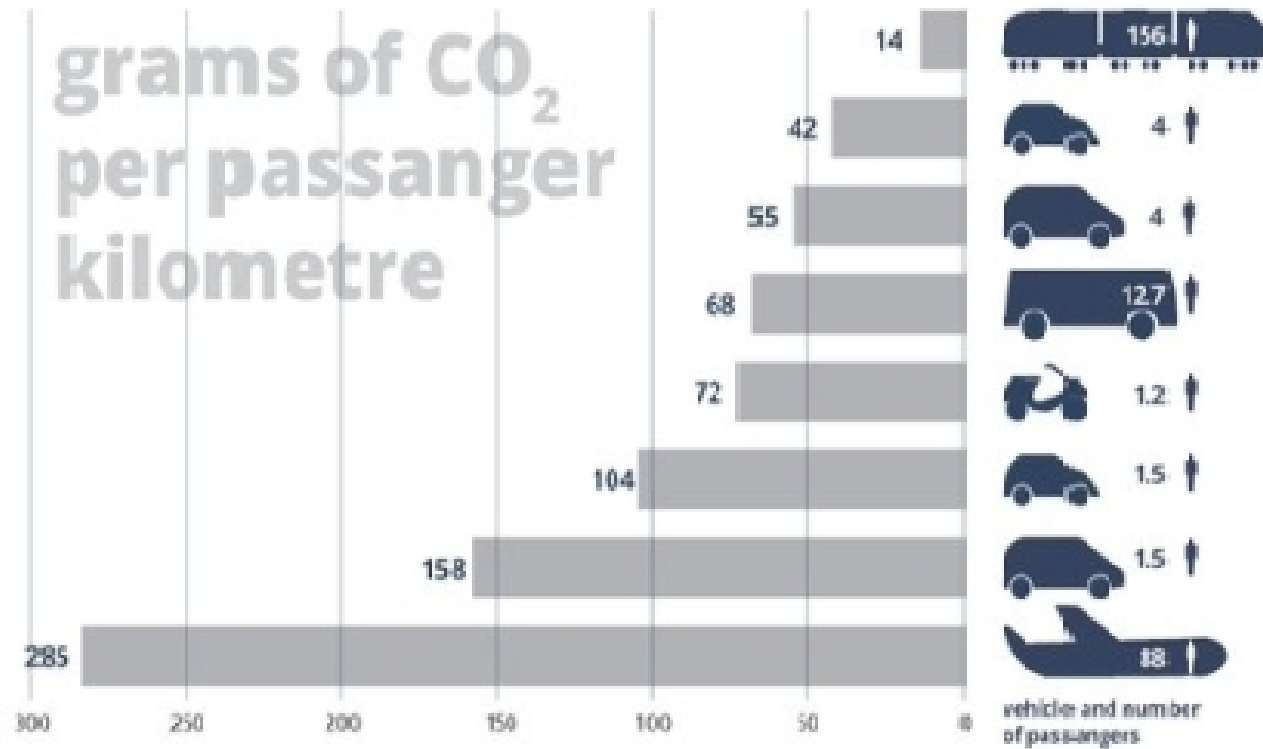

The chart shows that the number of fatalities is very low for airliners in comparison with cars or others method of travel

Weak points

- Pollution
- Expensive
- Passengers can be annoying

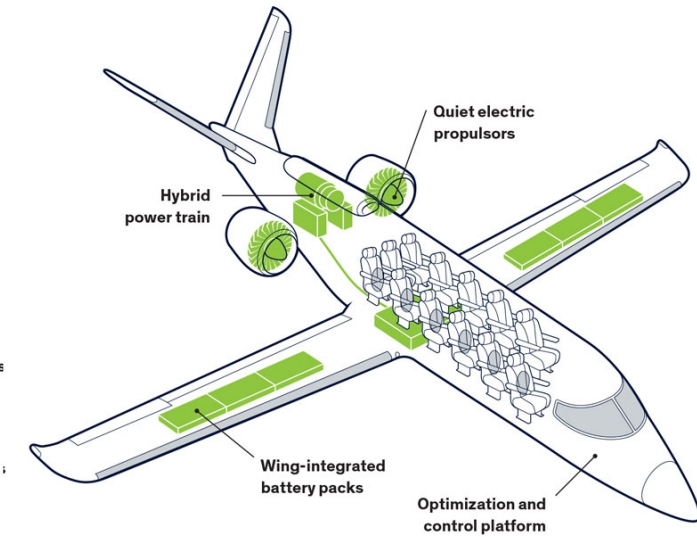

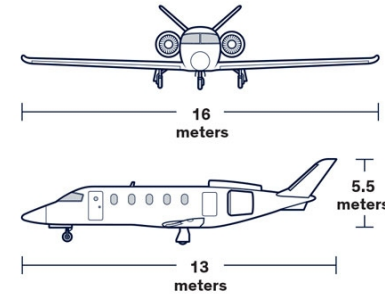

The chart shows the grams of Co2 per passenger, where we can see that the airliner is more polluting than others vehicles

Possible improvements

2020 / 2025

Hybrid airplane

2025 / 2030

E-Plane

Personal opinion

- Best mean of transportation for long distances
- Mean transportation of the future
- The flying experience is unique

The End
